Design Thinking Collaboration to Improve Data Footprint Awareness

International Work Practicum - 2024

Introduction

The Case

“How might we make people and organizations aware that their day-to-day data creation greatly adds to the CO2 emission, and achieve a change in their behavior?”

Design Thinking Process

Empathize

1. PHASE

Empathize

To further understand the problem, we split into three teams:

Research

Survey

Representatives

Empathize
1. PHASE

Survey

Demographic

Age

Environmental awareness

How environmentally aware are you?

Messages

How are messages sent?

Data waste

Awareness about data waste
% of unnecessary data

Data storage

How often do you delete data
and why?

Empathize
1. PHASE

Results

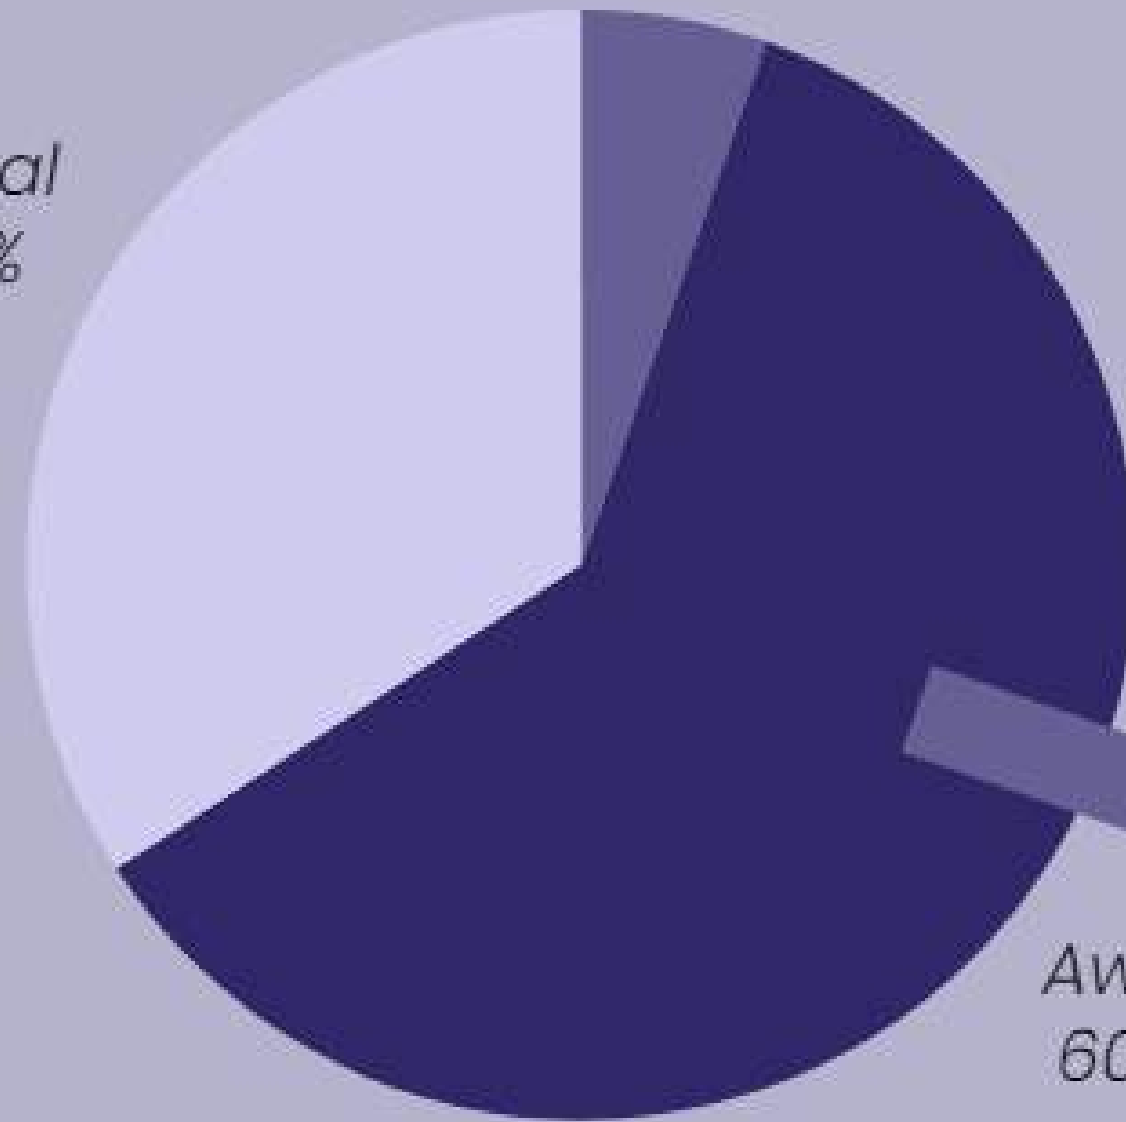

The data indicates that people under 25 are less aware of data waste than those older than 25.

How environmentally aware are you?

Neutral
34.2%

Not very aware
5.4%

Environmental & Data Waste Awareness

Are you aware of data waste?

Aware
60.4%

54%

Estimated Percentage of Unnecessary Data

Users & Data Deletion

How often do you delete your data?

Why Users Delete Data

Time-consuming

Fear of removing useful data

Can't find old/unused data

Keep memories to look back on

No incentive

Why Users Don't Delete Data

HOW ARE MESSAGES SENT?

Texting with multiple short messages and voice messages produce more CO₂ than longer paragraphs.

What do you think could reduce data waste?

Empathize
1. PHASE

Sara

32 years old

housewife, mother of two
kids, married & influencer

“As I am very busy, I need
an easy way to manage
my data”

acts

Sending pics of her kids
in the family group via
whatsapp

loves holding
memories forever

values

Online
popularity

Recognition

personality

Cares too much about
online presence & what
other people think

bad mood offline, good
mood online

arrogant

Empathize
1. PHASE
Persona

Clara

20 years old

Student: Marketing Major
and IS Minor

acts

meeting friends

She likes **photography**,
does it professionally at
weddings

values

friends
and
family

success & the
environment

personality

bit **shy** and not very
outgoing

online shopping
addicted

subscribes to shopping
websites

always **stressed** about
the **environment** and
uni

Empathize
1. PHASE
Persona

“ I need to be more aware of
data waste as an
environmentally conscious
person. ”

Michael

48 years old

electrician, married, two kids, lives a modest life

“ I don't care much about the environment, so I don't want any extra tasks. I would need a really easy solution to do something ”

acts

works long hours

lot of work documents

Only **deletes** data on his old phone when the **storage is full**

can't afford to change his lifestyle to benefit the environment.

values

loves his **family** and **friends**

introvert but confident and **polite**

pessimistic (life sucks)

needs

struggles to provide for his family

not good at communicating

Empathize
1. PHASE
Persona

John

55 years old

CEO of 5k employee mid-sized company (Meal-Kit delivery), PHD in Economics

acts

Single with no interest in long-term

values

parental pressure

judging unsuccessful people

narcissistic

unaware of data waste

needs

addicted to **instant gratification** and **success/results**

driving for the **biggest challenge possible**

“ As a CEO I have the opportunity to influence a lot of people ”

Persona

Define

2. PHASE

Research

- Research Q's:
- ① Is it better to store data locally or on the cloud?
 - ② Best ways to transfer heat emissions from Data Centers back to the grid?
 - ③ Average household emissions from data usage in Germany, Europe, and USA?
 - ④ What are the auto-generated settings for data collection on social media applications?
 - ⑤ what are the methods for changing these settings and what percentage of users do this?
 - ⑥ What is the typical size of a small text/email data package vs. a large text/email data package and associated emissions?
 - ⑦ How long is transportation data kept in Germany and what is the process for disposing of obsolete data?
 - ⑧ How much carbon emissions are associated with big data?
 - ⑨ What percentage of data is old and obsolete in each sector? (city, institutions, private, companies)
- 3:40 - meeting

Ideate

3. PHASE

Problem Statement

People and companies lack awareness of data consumption and how their data is stored in data centers which creates a negative environmental impact.

How Might We...

**Increase people's
awareness of CO2
emissions from data
waste?**

**Increase companies'
awareness of CO2
emissions from data
waste?**

**Seamlessly
integrate data
awareness into
daily life?**

**Streamline
data deletion
processes?**

**Reduce fear
associated with
deleting
unnecessary data?**

Ideate
3. PHASE

To ideate, we:

1. Split into our persona group
2. Determined a methodology
3. Compiled all ideas into a master list

**How might we increase
people's awareness of
CO2 emissions from data
waste?**

Ideate
3. PHASE

How might we increase people's awareness of CO2 emissions from data waste?

Digital pet

Energy consumption arcade

Interactive e-waste sculptures

Human Awareness Infographic

**How might we increase
companies' awareness
of CO2 emissions from
data waste?**

Ideate
3. PHASE

How might we Increase companies' awareness of CO2 emissions from data waste?

Annual employee training

Workshops on alternative solutions for data deletion

Cooperate with local schools

**How might we
seamlessly integrate
data awareness into
daily life?**

Ideate
3. PHASE

How might we seamlessly integrate data awareness into daily life?

Mobile wallet data storage

Power bank data storage

Cooperate with influencers/sports team/local suppliers (company)

App

**How might we
streamline data deletion
processes?**

Ideate
3. PHASE

How might we streamline the data deletion processes?

Manage email accounts

“Data Management” branch

Company-wide data deletion reminders

**How might we reduce
fear associated with
deleting unnecessary
data?**

Ideate
3. PHASE

How might we reduce fear associated with deleting unnecessary data?

Data Usage Awareness App

Test

5. PHASE

App

WHAT

- User Friendliness
- Practicality
- Reliability
- Appeal
- Effectiveness

HOW

- Star rating
- Survey
- tracking hours of use
- Longevity
- Test accuracy of the trackers
- bring in people to test app

WHY

- have an effective, usable, and reliable app for users to use on an everyday basis
- clear their unneeded data in order to decrease data waste

Energy Consumption Arcade

WHAT

- the effectiveness of generating awareness to companies and individuals with the different games and simulations

HOW

- have a sample group of people take a survey prior to playing in the arcade
- allow playing time for about an hour
- afterward create a post survey to see how much more aware they are
- rate their experience

WHY

- allows companies and individuals to see the effectiveness of the arcade
- responses from other users when deciding to partake in a workshop
- for annual company training or individual workshop about sustainability practices.

Interactive pet – DataMunch

WHAT

- **DataMunch** is an interactive digital pet that lives on your computer and thrives on a diet of old files and unused data.
- This virtual companion helps you to maintain a clean and efficient digital workspace

HOW

- You choose a virtual pet to adopt that you can then find on your desktop
- It grows by consuming your old files and data.
- Just drag and drop the files that you no longer need onto it, and then you will receive instant positive feedback
- It has interactive features to make the process more enjoyable and rewarding.

WHY

- Data waste is a growing concern. Unused files, outdated documents can clog up your computer and omit mass amounts of co2
- DataMunch provides a solution by turning the annoying, tedious chore of deleting files into a fun and interactive experience.

Company-wide Data Deletion Reminders

WHAT

- an automated data deletion reminder

HOW

- sent to every device on company wi-fi on the first Wednesday of every other month

WHY

- allows employees to take the same time to sort, organize, and maximize their data storage
- helps decrease data redundancy and eliminate unnecessary data
- frees up storage for essential files; overall reduces CO2 emission

Managing Email

WHAT

- **CleanSweep** is a powerful browser extension designed to help you maintain a clutter-free email inbox and file system.
- By automating the deletion of old files and emails, CleanSweep ensures your digital workspace remains efficient and organized.

HOW

- Every 30 days, CleanSweep automatically deletes 10 of your oldest files or emails unless you choose to star them
- Additionally, it brings up each file or email for review, allowing you to keep only what's necessary.

WHY

- Through research and surveys we have found that one of the main reasons people do not delete files is because it is too time consuming.
- CleanSweep should help to cut time in data deletion, reducing overall data waste and negative environmental impacts

Private Storage

WHAT

- A remotely accessible storage to store your data and make it available anywhere!

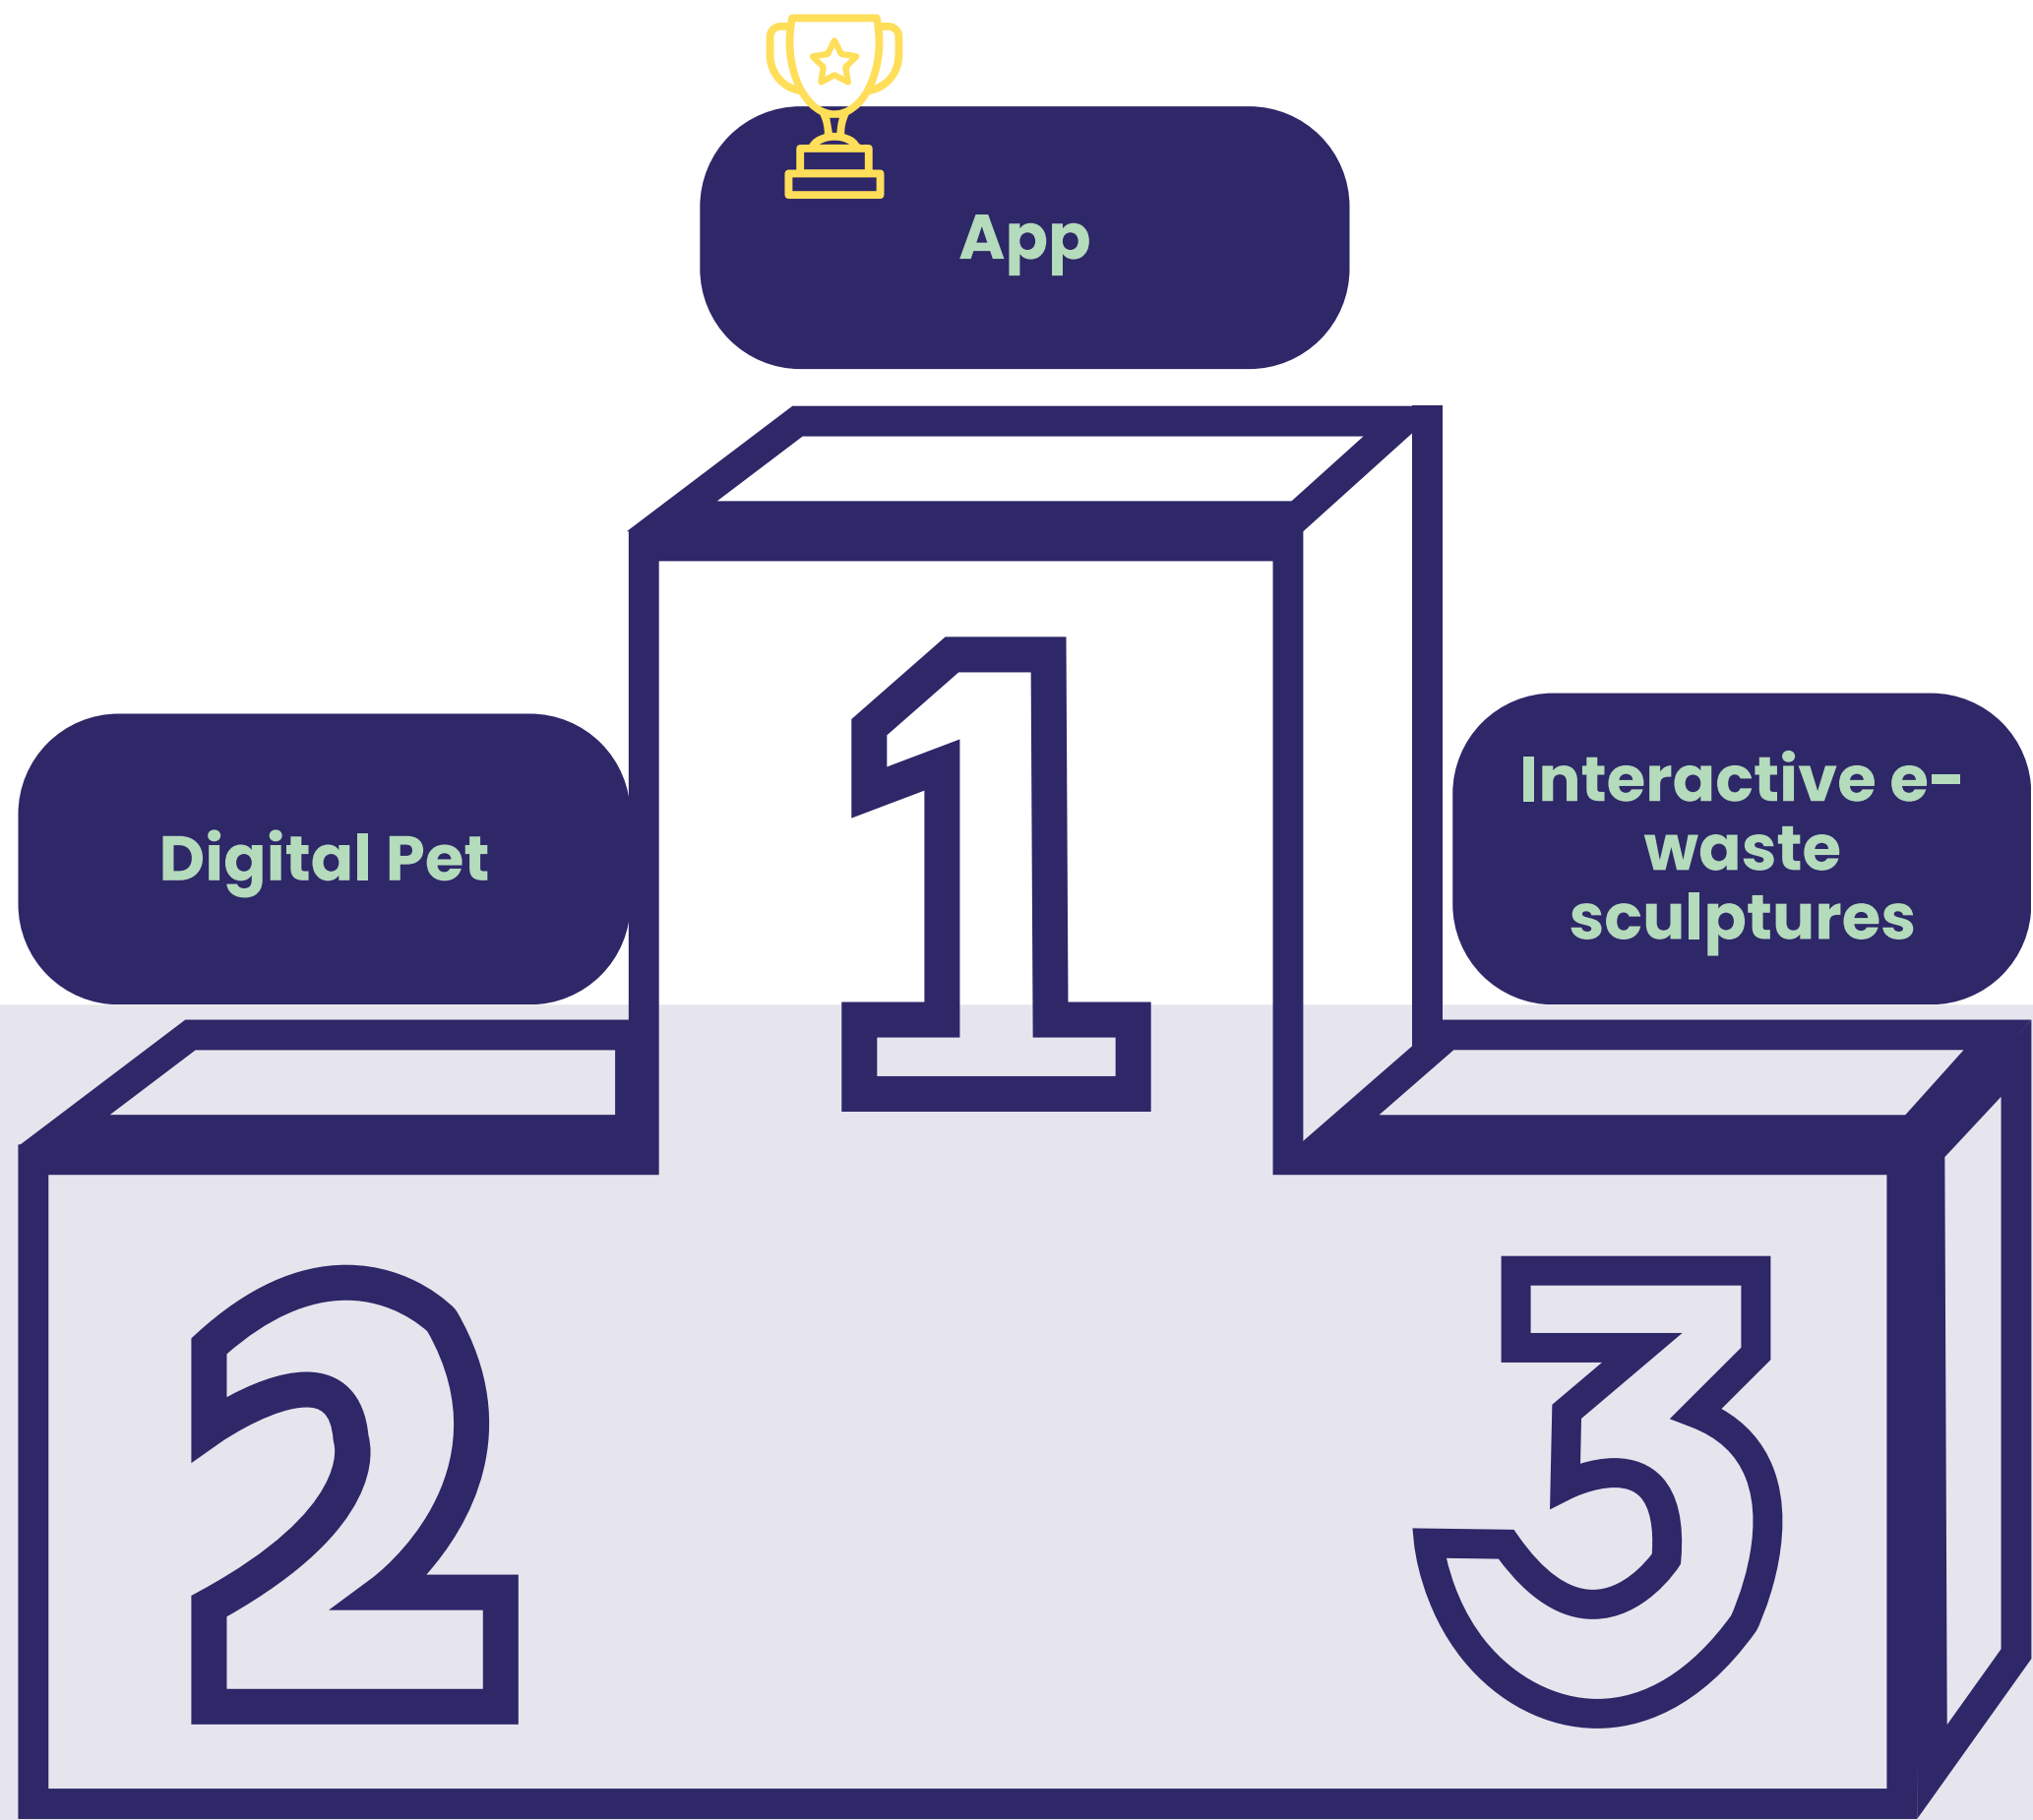

HOW

- Systems for NAS Storage already exist in a wide variety.
- Adding a NAS Storage System to your local network makes it accessible in your own network.
- This can be extended by using a VPN Service to make it securely available remotely

WHY

- A private NAS Storage allows people to store data and make it accessible remotely via VPN.
- By using this form of storage people gain independence from cloud providers - making storing of data possible without unnessecary redundancies and security concerns.
